PROFESSIONAL SUMMARY

Frontend Developer and Data Analyst with hands-on experience building React.js applications and analysing large datasets using SQL and Python. Worked on real-world projects including a JWT-authenticated Invoice Management System and ETL workflows on 129K+ records. Skilled in frontend development, APIs, databases, and data visualisation with experience working in onsite and remote Agile teams. Looking for an opportunity in software engineering, frontend development, or data analysis to apply strong technical and problem-solving skills.

EXPERIENCE

Frontend Developer Intern · Seasonedly (Pakistan)

Sep 2025 – Present Onsite

- Built a full-featured Invoice Management System with REST API integration, JWT authentication, and responsive UI delivered end-to-end within the first two months.
- Engineered reusable React.js component library using Tailwind CSS, reducing UI development time across the team by standardising design patterns.
- Implemented client-side routing with React Router and global state management via Context API, improving application performance and maintainability.
- Collaborated daily with backend developers via GitHub (pull requests, code review) in an Agile remote environment.

Data Analyst Intern · Excelebrate (UAE)

May – Jun 2025 Remote

- Performed end-to-end ETL pipeline on a 129,000+ record dataset using SQL and PostgreSQL identifying and resolving data quality issues that improved reporting accuracy.
- Created master tables and relational schema to consolidate disparate data sources, enabling faster downstream analysis.
- Produced executive-ready charts and visualisation summaries using Matplotlib and Seaborn, presented to stakeholders in weekly milestone reviews.
- Delivered all tasks on time within a fully remote, deadline-driven team environment.

TECHNICAL SKILLS

Languages	Python · C++ · SQL · JavaScript
Frontend	React.js · Tailwind CSS · HTML5 · CSS3 · Bootstrap · React Router · Context API · Responsive Design
Backend / API	REST APIs · Axios · JWT Authentication · Flask (basics) · FastAPI (basics)
Databases	PostgreSQL · MySQL · pgAdmin
Data	EDA · Data Cleaning · ETL · Seaborn · Matplotlib · Excel · PowerPoint Reporting
Tools	GitHub · VS Code · Google Colab · Replit · MS Office · Notion AI · ChatGPT · Gemini

KEY PROJECTS

- Invoicify:** Full invoice workflow application with responsive UI, REST API integration, and JWT-secured endpoints simulates a real-world SaaS billing system.
- Cyberpunk Website:** Neon-themed web application with Flask backend, demonstrating full-stack capability and creative UI execution.
- Portfolio Website:** Personal responsive site built with HTML/CSS, showcasing projects and skills to recruiters.
- Blood Bank System:** C++ desktop application managing donor and recipient records with search, add, and update operations.
- AI in Education Study:** Literature review examining AI tool usage patterns and limitations in educational contexts — published as a structured research report.
- Landing Page (Forage):** Modern marketing UI built with HTML/CSS/JS as part of the Forage Web Development virtual experience.

EDUCATION

HND Computing — Level 4 & 5

2023 – 2025

Pearson UK · NICON Group of Colleges, Rawalpindi
(internationally recognised)

CERTIFICATIONS

- Solutions Architecture Virtual Experience** — Forage 2025
- Web Development Virtual Experience** — Forage 2025
